EDUCATION

Mississippi State University

Bachelor of Science in Mechanical Engineering

Expected Dec 2028

GPA: 3.68

Certification & Skills

Certifications: Certified SolidWorks Associate (CSWA) ♦ America's Cutting Edge (ACE) ♦ GD&T ♦ OSHA-10 ♦ CPR

Skills: Python ♦ SolidWorks ♦ CAD ♦ Fusion 360 ♦ MATLAB ♦ Surveying ♦ Waterjetting/CNC ♦ Excel ♦ AutoCAD

♦ 3D-Printing ♦ Manufacturing

WORK EXPERIENCE

Project/Field Engineer Co-op

Tyson's Corner, VA

Ulliman Schutte

January 2026 – June 2026

- Used AutoCAD to design a DI Yard Pipe layout including depth, midline coordinates for manholes/piping
- Designed roof drainage systems in AutoCAD for runoff water, which included a bill of lading with specs, GPS coordinates, and percent of grade needed for efficient/code compliant drainage
- Ran computational fluid analysis to calculate the most efficient/code compliant grade for the DI yard piping and for the roof drainage system
- Coded using a macro in Excel to create an automated tracker that systematically entered inputs, tracked job codes, and checked/created necessary job codes; is now implemented across the USC jobsites in the DC area
- Assisted with surveying activities, including layout verification and field measurements
- Prepared and reviewed submittals, RFIs, and As-Builts to ensure compliance with project specifications
- Coordinated with field crews, engineers, and project managers to support daily operations

Optical Technician

Weber City, VA

Weber City Eye Care

February 2024 – August 2024

- Performed preliminary eye examinations, including operating autorefractor equipment to obtain accurate refractive measurements
- Conducted pre-testing procedures and assisted in screening patients for ocular abnormalities
- Trained in optomap retinal imaging, capturing high-quality scans to support optometrist evaluations
- Prepared patients for exams, explained testing procedures, and ensured accurate documentation of results

Relevant Course Work

Modeling and Manufacturing

August 2025 – December 2025

- Designed in SolidWorks, tested, and manufactured an air powered engine in compliance with ACE
- Designed a mini pool table with a spring-loaded cue in SolidWorks, then used Fusion360 to manufacture, stress tested each parts along with functionality, and finally completed an SOP (Standard Operating Procedure) for mass production

Research

Dr. Vivek Khare – Space Structures & Composite Research

August 2026-Current

Mississippi State University

- Designing and testing thin carbon fiber booms for space applications
- Tested different carbon composites elasticity using tensile testing

Extracurricular Activities

Mississippi State Formula SAE

August 2025-Current

- New member Project; Ergojig-seat positioning along with instrument cluster position, steering rack position and petal tray location and angle
- Water jetted brackets for the pedal tray. Responsible for changing out the differential bearings.

Mississippi State Space Cowboys

August 2026-Current

- Manufactured high pressure release valves

Personal Project

- Designed and simulated an entire V8 engine: designed pistons, engine block and the seals/gaskets
